General Comments
A follow-up monitoring inspection was conducted today. At the time of the visit, all children and staff were observed outdoors actively engaged in open-ended play using a variety of materials, including dinosaurs, building materials and cars/trucks to play and ride on. The compliance order regarding updated licensing contact information has been completed; the details are now clearly visible on the parent information board. Additionally, the recommended allergy information, as previously requested by the former Quality Assurance Monitor, has been appropriately posted on the parent communication board.
