General Comments

Well defined learning / play centers were observed throughout the facility.

Open ended art was observed in all areas of the facility. It was evident that educators and children take pride in their art creations. Several pieces of artwork, learning stories, and individualized binders full of documentation, were observed.

Positive child guidance techniques were observed in all groups - educators at the children's level, educators using positive language, and educators providing proper supervision.

A conversation was had with administrator regarding the current sensory room. This room is not measured space, and if operator no longer wants to use it as a sensory room, they can switch it to something else, i.e. a staff room and or an office.

A conversation was had regarding "Circle Time", in the 3-5 room. Circle Time works if children are interested in it, but if children are not interested, they are to be provided with another activity. Scheduled "Circle Time" is not recommended.

A conversation was had regarding incident reports and how and when to send incident reports to licensing. Please review section 6.6.2, Incident Reports, on pages 46 - 48, in the Operator's Manual.

A conversation was also had in regard to Communicable disease control - outbreak management. Please review section 5.0, Communicable disease control - outbreak management, on pages 227-228.
