General Comments

Monitoring Inspection:

Children and educators were observed engaged in a variety of activities this morning/afternoon. All children spent time outdoors in the morning and in the afternoon. The infants were observed exploring their indoor play environments. Educators have added age-appropriate materials to each infant environment including large loose parts and a canvas sheet on the wall in the art area for the infants to explore painting. The preschool children were observed exploring their environment freely and during afternoon snack.

QA Monitor discussed art materials in the Junior Pre-K Room with administrator on site - materials were observed to be in closed bins out of children's reach. Ensure open ended art materials are accessible and organized in open containers.

QA Monitor recommended increasing sensory opportunities within the Pre-K Room. Providing a variety of sensory experiences will help support children with sensory-seeking behaviours.

Handwashing routines were observed after outdoor play, during washroom routines and before mealtimes.
Diaper changing procedures were observed to be followed.
Chicken noodle soup with bread and butter were served for lunch. Crackers with cream cheese were served for afternoon snack.
Monthly fire drills are documented.
Daily attendance records are accurate and reflect all children present. Child-to-staff ratio was observed to be met during Monitoring Inspection. Infant Daily Information sheets observed to be completed throughout the day.
Facility is currently meeting the 50% trained Early Childhood Educators (7/14) requirement.
