General Comments

A Monitoring Inspection occurred June 23, 2025.

Children were observed engaging in outdoor play, actively exploring their environment.

Educators shared that the children are currently very interested in being active outdoors, exploring bugs, engaging in sensory play with loose parts, and building a nature frame for their outdoor walk. Educators were observed using positive language and providing gentle reminders to support children's play and learning.

The daily incident log is maintained consistently. The room is set up in an inviting manner, with materials arranged to encourage children's exploration and play. Ideas from the webs and learning stories are reflected in various areas such as the art area, library, kitchen, and dramatic play spaces. A sensory area is available in sufficient quantity, with accessories provided and regularly rotated to maintain interest.

Daily activities are purposefully planned and documented within the program, providing opportunities for both individual and group experiences. During a conversation with the Administrators, several strengths of the facility were identified, including the completion and expansion of webs with the children, well-defined learning and play areas, and the display of several pieces of the children's artwork throughout the space. Some needs were also discussed, including restocking paper indoors and maintaining carpets.
