General Comments
<p>Learning stories are being completed throughout the facility. Educators are following the children's interests through webbing as seen on the classroom walls.</p> <p>Quiet time in the 3–4-year-old room has implemented a quiet time though there are still having some learning curves with the process and routine of resting on the mats and cots. Curtains have been purchased to darken the room to help the children rest.</p> <p>A rest period of at least 30 minutes is required for children. After 30 minutes the children that are not napping can join together for quiet activities, so they do not disturb the children that are still resting.</p> <p>Advised administrator and educators, to keep a record of sugar levels and the amount and time insulin was administered to the child when they are not wearing their dexcom device.</p> <p>The educators were friendly and welcoming during the visit.</p>
