General Comments
<p>Regular monitoring inspection was performed on this date. Children were observed resting during quiet time. The facility has created a nice balance between nappers and non-nappers. Children who required sleep were given a mat and blankets for napping while other children who do not nap were given the opportunity to play quietly. Children were observed playing with sensory items and enjoyed using flashlights and camping lamps while the lights were dimmed. Other preschool aged children were painting at this time. All children were engaged and content while the other children slept. Positive behaviour guidance was observed at all times throughout the inspection.</p>
