Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

Children were getting ready for outdoor play time when licensing staff arrived. The children were engaged in a variety of activities in the outdoor play area such as the sandbox, slide, spinning teeter totter and playing with balls.

The indoor environment is clean and organized. Sound proofing material has been added to the walls to help noise of the open space. The indoor materials are easily accessible to the children. The bins are labelled with pictures and words so the children can easily select the items they want to use.

Licensing staff recommends educators go through the books in the after-school room and to make sure there is a variety for all after-school ages and another bookshelf be used so the books can be properly displayed.

Licensing staff also recommends the swinging teeter-totter be moved further from the fence so there is less chance of injury.

Educators were observed asking the children open ended questions to help develop language skills. Children are familiar with the daily routine of the facility and seem comfortable in the environment.
