General Comments

Children were playing with a sensory bin filled with appeared to be oats and lentils, there were also trucks, dinosaurs and animals in the bin as well. Operator was observed on the floor playing in the sensory bin with the children. She was observed asking the children questions and discussing about what items were found in the bin.

Once children were finished playing in the sensory bin, they moved onto a painting activity. Children found stamps and wanted to use them, operator followed the children's lead and did a stamping activity with them instead. When the children appeared to be finished with the stamps, she laid out her initial painting activity and invited the children to the table. Those who did not wish to participate were able to play freely around the room.

Children went outside for an hour before lunch. Operator had just purchased some new play material that the children were excited to play with. She was also quick to act and comfort children when needed.

Operator was observed interacting with children, ensuring her time was shared equally amongst all the children.

Documentation is evident throughout the ELC home's licensed space as children's artwork/creations were observed displayed on walls.

Unable to fully inspect outside play space as there was still snow on the ground. Quality Assurance Monitor will follow up with a monitoring visit for outside plays space to ensure compliance with different play surfaces, protective surfacing and shade once snow melts.
