playing with trucks.

Indoors the children were observed engaged in a variety of activities that included playing with the newly added materials that included trucks in a variety of sizes, painting canvases, bouncy balls, using play dough, and cars. Additionally, both groups of children were observed eating lunch with hand washing occurring beforehand.

Outdoor bins were created and stocked with bubbles, sketchbooks, paint markers, markers, pencils, crayons, animal figures, sensory items, hockey sticks and a puck, bug habitats, and chalk.

Traffic areas are kept clean, and outdoor walkways are free of clutter. Toxic products such as cleaning agents are securely locked and inaccessible to children. The changing area is located within one metre of a sink, and diaper changing procedures are clearly posted.

A clearly visible and prominent area was designated for the posting of the facility license, current monitoring reports, and any orders for compliance. Additional documents reviewed included incident logs, daily attendance records, one staff file, and records of evacuation and monthly fire drills.

A conversation took place with the administrator and operator on the following:

- Educators to ensure infant bottles are labelled and fitted with protective covers.
- It is recommended that educators create a visual schedule in the four- to five-year-old classroom and post it in a visible location for children to view.
- The operator is responsible for ensuring the printer is maintained with adequate ink and paper to support educators in printing documentation.
