### General Comments

A Monitoring Inspection occurred on July 25, 2025.

Children were observed during indoor free play and during the transition to a walk in the community. Educators shared that the children are currently very interested in community excursions, STEAM activities, LEGO building, being creative with various art materials, and staying active at local parks. Throughout the visit, educators were observed using positive language and offering gentle reminders to support children.

A daily incident log is maintained, and monthly emergency evacuations are completed and posted. The daily routine was visibly posted. A notice regarding the presence of a communicable disease was also clearly posted to inform families.

The learning environment was organized and welcoming. Books selected to reflect the children's current interests were accessible, and several pieces of children's artwork were displayed throughout the space. Well-defined learning and play areas were observed. Traffic areas and outdoor walkways were clean and free of clutter, and all toxic products, including chemical cleaners, were stored securely and out of children's reach. Daily activities are purposefully planned and documented in the program. The programming reflects the interests and needs of the children, offering them opportunities to explore, discover, and engage in meaningful play and learning experiences.
