General Comments

The Operator has one child currently enrolled that is not her own child. The child was not in attendance at time of visit. Inspection conducted by Jenelle Hanscom and Nancy Glendenning.

The environment is set up with different learning materials and centres. The operator is using webbing to document the children's learning. The environment also has the children's artwork and pictures of them displayed.

Operator was advised to keep receipts and records in a file at the facility for any government spending.

Operator stated that the fire extinguisher is going to be inspected this week. Please ensure that it is checked yearly.

There is a trampoline in the outdoor play space that Operator said is never used for daycare purposes. Also, if you plan to use the swing set structure, 30 cm of surfacing will be required around it.

Licensing staff can now recommend facility for licensing.
