Comments: Mulch under stationary equipment depleted. As per licensing regulation 9.3-33(2): Stationary equipment in the outdoor play area shall be surrounded by a protective surfacing. Protective surfacing is required for any stationary climbing structures regardless of height. It is recommended to be raked weekly to ensure proper depths are maintained.			

General Comments
<p>A renewal inspection occurred today, June.26/2025. Licensing attempted to conduct a renewal inspection June. 25/2025 but the facility went on a field trip to Rainbow Park. Licensing reviewed the parent board upon arrival, after signing in. Their parent board had their license clearly visible, along with monitoring and renewal reports, weekly menu, evacuation procedures, licensing contact information and contact information for the board members.</p> <p>The play environment had a train station set up for the children, a science station, building cushions and a quiet corner, all in defined learning areas. Children's learning was visible through documentation on the white board, photographs and project work displayed throughout the room. The pet salon was a favorite and displayed the children's current interests.</p> <p>The outdoor play area materials and equipment were safe and age appropriate but the mulch had depleted under the stationary equipment. Licensing had a conversation with the admin, and they will have educators rake the mulch to proper depth. Licensing will follow up.</p> <p>All checks were observed and completed.</p>
