Comments: Deficiency is now compliant			

General Comments
When licensing staff arrived children and educators were cleaning up to go outside. The climbing structure has been removed from the outdoor play area and holes drilled in the tires. Several tires had water located within them as the holes had been drilled on the side instead of top and bottom of tires. The administrator stated they had already noticed and had made a request to have more holes drilled. A wooden platform has been moved next to the sandboxes to limit climbing and walking on the boxes. Children were observed walking along the boxes by licensing staff on today's visit and a recommendation was made to replenish wood mulch in any areas around the sandboxes to ensure children's safety in case of a fall. Children were playing in the sandboxes with sand toys. The sand is still packed in areas, and it is recommended that a finer sand be placed on top of current sand for play. A new staff's file was reviewed and all checks in order. Ensure signed statements and job descriptions are located in each staff's file on-site. Licensing staff and the administrator discussed an exemption request with the administrator providing further details on request.
