| <p>General Comments</p> <p>A monitoring inspection was completed today.</p> <p>Children were observed throughout the morning as they engaged in play in the outdoor play environment. Bikes, dolls, play structure, slides, playhouse, and leaves were materials and equipment children were observed to use during the inspection.</p> <p>Children are provided with many opportunities to explore their natural world in the outdoors. Children shared with QA Monitor the pumpkin they had left for the raccoons in the woods. They were eager to share that the racoons had eaten all the seeds. The stem of the pumpkin had come off, as they explored it, their educator invited conversation and asked questions about how it felt.</p> <p>Indoors a variety of materials are available for the children to engage with. Children shared their favourite book about emotions and had a tea party. As discussed with the early learning consultant, the addition of an open art area and sensory area are being added.</p> <p>Documentation of activities and learning is currently shared via social media. Operator will make documentation visible in the learning environment with the addition of a documentation board displayed at the children's level.</p> <p>A copy of the NB Curriculum Framework was provided to the operator during the inspection.</p> |
