General Comments

There is evidence of purposely planned programming as seen by the learning stories and children's artwork posted throughout the facility.

There are many natural wooden materials and plants in the classrooms. The large windows allow plenty of natural light to shine in the rooms.

Children were in the outdoor space during majority of the visit. The older children were marking on the pavement with chalk, drawing pictures and having their bodies traced. The two-year-old group and infant groups were engaged in free play activities and driving the lil-tyke's cars around.

Educators were observed nurturing children that didn't seem to be feeling well or tired from the weekend. A couple educators made phone calls to parents to update them on how their children were doing. Examples of this was when one child didn't seem to be their normal self and when another child had difficulty taking their medication.

The operator is in the process of setting up the outdoor play space. The contractor was there today building a gazebo. Operator stated that materials are on order and shade sails will be installed in both outdoor play areas. The facility seemed to be running smoothly during the visit. There was plenty of communication between the educators.
