General Comments

Monitoring Inspection:

Children and educators were observed engaged in a variety of activities this morning including outdoor play, art, stories, and building. Children and educators in Room 3 were observed participating in quiet activities while half of the group was napping. The children in Room 4 spent the morning outdoors in the outdoor play area.

It was determined through conversation that the YMCA is currently creating a new purposeful planning and documentation process that will be put in place this month. Each room has had new children transition into the group recently; educators are currently planning activities that allow them to get to know each child better.

Each learning environment is set-up with a variety of materials and invitations that support the children's interests and learning experiences. Each environment appears to be organized and well-maintained. Materials have been added that create an inviting an inviting space.

Nap time was observed today. The environments are dim, and educators put soft music on to ensure the environment is relaxing for children. The children's cots are set-up with bedding and are situated at an adequate distance apart. Educators observed comforting children as they settle in for nap.

An inspection of the outdoor play area was conducted; the outdoor play area includes a variety of materials that were organized and accessible to children. The climbing wall/slide structure does not have protective surfacing beneath it, as it is currently situated on turf. The structure is to be relocated to the area with pea gravel or appropriate protective surfacing is to be added underneath. The QA Monitor discussed with staff that the wooden slide should be checked for splinters each time an outdoor play area safety check is conducted; recommend adding it as an item on the safety checklist.

Handwashing routines were observed during washroom routines and after outdoor play.

Chicken strips, garlic pasta and corn were served for lunch today.

Monthly fire drills are documented.

Daily attendance records are accurate and reflect all children present. Child-to-staff ratio was observed to be

General Comments

met during Monitoring Inspection.
New staff file (2) review was completed; all required documents are in place.
Incident logs are complete and signed by parent/guardians.
Facility is currently meeting the 50% trained Early Childhood Educators (3/5) requirement.
