### General Comments

#### Monitoring Inspection:

The children and the educator were observed having morning snack. As the children finished eating, the educator washed the children's hands and faces. The educator then provided books to the children as she took turns changing their diapers. Proper diaper changing procedures were followed. Once the children were washed and changed the educator applied sunblock to the children and headed outside to play.

The indoor and outdoor play area have a variety of materials for the children to explore. While inside the children played with books, dolls, play food, and ride on toys. While outside the children played with cars, sand, sand toys, balls, and took turns climbing and sliding on the play structure.

Each child has a portfolio with photos and documentation that highlights their learning experiences and interests. Documentation that reflects the New Brunswick Curriculum Framework is also displayed throughout the indoor play area at the children's level.

Attendance forms, fire drills, and daily information sheets are completed and up to date.
